PREFACE

A comparative photo analysis was performed to identify military areas associated with the 13th Chinese Communist Army at Kai-yuan, China.

Kai-yuan Headquarters 13th Army [] is co-located in the BE/TDI with the Kai-yuan Army Barracks South []. This area does not contain the administrative buildings normally observed with an Army Headquarters installation. These buildings; however, are observed at the Kai-yuan Army Barracks West [] which is the probable location for the Army Headquarters.

No unit training areas or driver-training courses were observed although one area is identified as a "suspect" driver-training area. Random trenching and automatic weapon positions are observed on several hills.

One possible communications tower/antenna was observed. The apparent lack of a separate communication facility may indicate that the military communication facility is possibly housed in one of the administration buildings.

SUSPECT DRIVER-TRAINING AREA (See Figures 2 and 4) 23 43 05N-103 16 20E

An analysis of photography does not reveal a driver-training area which normally is observed near an Army Headquarters area. However, an area 1.6 nm east of the center of town is designated as "suspect." This area appears to be non-military; however, loop roads are observed which could be used by the military units.

It is possible the main road network in the environs of Kai-yuan is used for driver-training and road-testing of vehicles.
